## HermoCos P6

Emulsifier | • High compatibility with oils • High compatibility with actives • Light skin feel

### Product Information

- Category: W/O Emulsifier
- Appearance: Transparent, Fluid
- Odor: Characteristic
- INCI Name: Cetyl PEG/PPG-10/1 Dimethicone, Polyglyceryl-2 Isostearate, Polyglyceryl-4 Isostearate, Polyglyceryl-2 Diisostearate
- CAS NO: 144243-53-8, 73296-86-3, 91824-88-3, 67938-21-0
- HLB : 5
- Certification: 

▲ HermoCos P6

### Formulation Characteristic

- Recommended Use Level: 1-4%
- The optimal range for the oil phase content is between 22% and 35%.
- Application Direction: W/O Cream Skincare, Suncare, Make up and water-based cream products.

### Product Introduction

HermoCos P6 is a **W/O non-ionic emulsifier** suitable for various lotion and cream formulations. It has high compatibility with commonly used plant oils, as well as with active ingredients, making it ideal for formulations with a high content of active ingredients. It easily disperses pigments and can be added to both chemical and physical sunscreen ingredients.

After emulsification, the formula offers a **light, non-greasy, and comfortable** skin feel. Even with a high water content, it maintains excellent stability. It is particularly suitable for low-viscosity W/O lotions, sunscreens, makeup, and water-based cream products. The product is easy to handle and works well in both cold and hot processes, resulting in a smooth, glossy cream texture.
