- Category: Anti-Aging Active Oil
- Appearance: Yellow, Fluid
- Odor: Characteristic
- INCI Name: Camellia Oleifera Seed Oil
- CAS NO.: 225233-97-6
- Certification:

Formulation Characteristic

- Solubility: Oil Soluble
- Recommended Use Level: 2-5%
- Application Direction: Skin Care, Color Cosmetics, Hair Care

▲ Makatta Simal® Varu

Product Introduction

Makatta Simal® Varu is the camellia oil made from the national-treasured species of white flower and small gold-color seeds; it is the Taiwan native species grown in the high mountains in central Taiwan. Makatta Simal® Varu is the virgin oil and contains the active ingredients preserved through the cold press (30-40°C) which is different from oils that are pressed with high temperature to destroy the active efficacy and nutrients. In addition to the oleic acid, it is also rich in Vitamin E, Squalene, phytosterol, and polyphenol compounds to be the active oil of high heat tolerance and light stability. It is the healthy plant oil for BPC products of **nourishing, repairing and anti-aging**. The Taiwan Camellia Oil has an elegant odor, and its appearance is more pure gold than other species around the world.

● Taiwan Camellia

- Makatta Simal® Varu is the prime cold-pressed virgin oil of Taiwan Camellia Seeds, also called the “oriental olive oil” ; the seed harvest period is only 2 months in autumn to produce very limited yield.
- Taiwan Camellia is the national-treasured species with a white flower and small gold-color seeds ; the yield is limited for the small seeds but its oil contains 90% unsaturated fatty acid which is the highest percentage among all the species of Camellia.
- Taiwan Camellia is planted in the center of the island, at the altitude of 1,000 meters in fresh mountain air; we need to wait for 1,825 days of growth, 336 hours of sunshine, 24 hours of processing to obtain 100% good quality oil.
- Taiwan Camellia oil has an elegant odor, and the appearance is more pure gold than other species around the world; the Taiwan Camellia is not easy to be harvested but it is a strong, adaptive species.
